

Fiscal Year 2020 Entry/Exit Overstay Report

September 30, 2021

Fiscal Year 2021 Report to Congress

**Homeland
Security**

U.S. Customs and Border Protection

Message from the Secretary

I am pleased to present the following “Fiscal Year 2020 Entry/Exit Overstay Report” prepared by the U.S. Department of Homeland Security (DHS). Pursuant to the requirement contained in Section 2(a) of the *Immigration and Naturalization Service Data Management Improvement Act of 2000* (Pub. L. 106-215) and the Joint Explanatory Statement, which accompanies the Fiscal Year 2021 Department of Homeland Security Appropriations Act (P.L. 116-260), DHS is submitting this report on overstay data.

DHS has generated this report to provide data on departures and overstays, by country, for foreign visitors to the United States who were expected to depart in Fiscal Year (FY) 2020 (October 1, 2019 - September 30, 2020).

This report is being provided to the following Members of Congress:

The Honorable Dick Durbin
Chairman, Senate Committee on Judiciary

The Honorable Chuck Grassley
Ranking Member, Senate Committee on Judiciary

The Honorable Jerrold Nadler
Chairman, House Committee on Judiciary

The Honorable Jim Jordan
Ranking Member, House Committee on Judiciary

The Honorable Lucille Roybal-Allard
Chairwoman, House Appropriations Subcommittee on Homeland Security

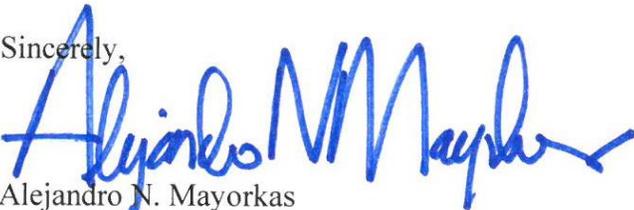

The Honorable Chuck Fleischmann
Ranking Member, House Appropriations Subcommittee on Homeland Security

The Honorable Christopher S. Murphy
Chair, Senate Appropriations Subcommittee on Homeland Security

The Honorable Shelley Moore-Capito
Ranking Member, Senate Appropriations Subcommittee on Homeland Security

Inquiries relating to this report may be directed to the DHS Office of Legislative Affairs at (202) 447-5890.

Sincerely,

A handwritten signature in blue ink, appearing to read "Alejandro N. Mayorkas". The signature is fluid and cursive, with a prominent initial "A" and a long, sweeping tail.

Alejandro N. Mayorkas
Secretary of Homeland Security

Executive Summary

This report provides data on expected departures and overstays, by country, for foreign travelers to the United States who entered as nonimmigrants through air or sea ports of entry (POE) and who were expected to depart in FY 2020 (October 1, 2019 – September 30, 2020).

An overstay is a nonimmigrant who was lawfully admitted to the United States but who remained in the United States beyond the authorized period of admission. The authorized period of admission can be a fixed period or for the duration of a certain activity, such as the period during which a student is pursuing a full course of study or any authorized technical/practical training. U.S. Customs and Border Protection (CBP) identifies two types of overstays: 1) individuals for whom no departure has been recorded (Suspected In-Country Overstays), and 2) individuals whose departure was recorded after their authorized period of admission expired (Out-of-Country Overstays).

Determining lawful status requires more than matching entry and exit data. For example, a person may receive from CBP a six-month admission upon entry and then subsequently apply for and receive from U.S. Citizenship and Immigration Services an extension of up to six months. Identifying extensions, changes, or adjustments of status are necessary steps to determine whether a person has overstayed their authorized period of admission.

Valid periods of admission to the United States vary; therefore, it was necessary to establish “cutoff dates” for the purposes of this report. Unless otherwise noted, the tables accompanying this report refer to departures that were expected to occur between October 1, 2019 and September 30, 2020.

Due to the COVID-19 outbreak, the FY 2020 data represents an anomaly when compared with the prevailing trend of decreasing Expected Departures and Overstay. Expected Departures in FY 2020 (46,195,116) were 17.40 percent lower than in FY 2019 (55,928,990) and were 6,124,522 less than the five-year consolidated report average of 52,319,638. The drop in Expected Departure count increased FY 2020 Overstay Rates. The decrease in the Expected Departure population can be attributed to a multitude of factors including travel restrictions enacted in response to the COVID-19 outbreak. This report presents the overstay rates of those who remained in the United States beyond their authorized period of admission with no evidence of an extension to their period of admission or adjustment to another immigration status. Rates are provided for the following major categories:

Total Overstay Rate

CBP determined there were 46,195,116 in-scope nonimmigrant admissions¹ to the United States through air or sea POEs with expected departures occurring in FY 2020, which represents the majority of air and sea annual nonimmigrant admissions. Of this number, CBP calculated a total overstay rate of 1.48 percent, or 684,499 overstay events. In other words, 98.52 percent of the in-scope nonimmigrant entries departed the United States on time and in accordance with the terms of their admission.

This report breaks down the overstay rates further to provide a better picture of those overstays who remain in the United States beyond their period of admission and for whom there is no identifiable evidence of a departure, an extension of period of admission, or transition to another immigration status. At the end of FY 2020, there were 584,885 Suspected In-Country Overstays. The overall Suspected In-Country Overstay rate for this scope of travelers is 1.27 percent of the expected departures.

Due to continuing departures and adjustments of status by individuals in this population, by the end of December 2020 the number of Suspected In-Country Overstays for FY 2020 decreased to 566,993, resulting in the Suspected In-Country Overstay rate of 1.23 percent. As of the end of December 2020, DHS has been able to confirm the departures or adjustment of status of more than 98.77 percent of nonimmigrants scheduled to depart in FY 2020 via air and sea POEs.

Visa Waiver Program (VWP) Country Overstay Rate

This report separates VWP country overstay figures from non-VWP country figures. For VWP countries, the FY 2020 Suspected In-Country Overstay rate is 0.56 percent of the 16,232,821 expected departures.

Non-Visa Waiver Program Participant Countries Overstay Rate

For non-VWP countries, the FY 2020 Suspected In-Country Overstay rate is 2.22 percent of the 13,807,503 expected departures.

Student or Exchange Visitor Overstay Rate

For nonimmigrants who entered on a student or exchange visitor visa (F, M, or J visa), the FY 2020 Suspected In-Country Overstay rate is 1.55 percent of the 1,801,550 students and exchange visitors scheduled to complete their program in the United States.²

Canada and Mexico Overstay Rates

Unlike other countries, a majority of travelers from Canada and Mexico enter the United States by land. Figures pertaining to Canada and Mexico are presented separately from the other countries because air and sea information represents a smaller portion of the Canadian and

¹ See Appendix A for a full list defining “in-scope nonimmigrant classes of admission.”

² Excludes Canada and Mexico students or exchange visitors.

Mexican travel population. For Canada, the FY 2020 Suspected In-Country Overstay rate for those traveling through air and sea POEs is 0.56 percent of 9,382,043 expected departures. For Mexico, the FY 2020 Suspected In-Country Overstay rate for those traveling through air and sea POEs is 2.39 percent of 3,055,056 expected departures. This represents overstays by people who arrived by air and sea POEs and does not include overstays by people who arrived by land.

The FY 2020 report covers the same classes of admission as the FY 2019 Entry and Exit Overstay Report.³ These classes include those traveling to the United States temporarily for business and pleasure, including those from VWP designated countries, traveling under an Electronic System for Travel Authorization, student travelers, worker classifications, and other classes of nonimmigrant admission.⁴ The only excluded classes are diplomats, crewmembers, noncitizens in transit, and Section 1367 special protected classes (Appendix B).⁵

In FY 2020, the Department continued to develop its overstay mission capabilities. With advanced biometrics, the ability to confirm traveler identity at border crossings has improved, and has increased the ability to identify overstays. To date, CBP has biometrically confirmed over 63,500 Out-of-Country Overstays. Furthermore, the vetting unit responsible for assisting the review of Out-of-Country Overstay leads is continuing the notification process for VWP travelers who have overstayed their period of admission in the United States, including emailing overstays regarding their non-compliance and informing them of the ramifications of their violation. CBP continues to notify VWP travelers in advance of the end date of their period of authorized admission. CBP plans to further expand these notifications to additional populations. Additionally, the Department continues to require VWP countries with an overstay rate equal to or exceeding two percent to implement a public awareness campaign intended to educate their nationals on the importance of abiding by the terms of their admission to the United States.

The Department continues to improve its data collection of both biographic and biometric data on travelers departing the United States, and these improvements are discussed in this report. The Department will continue to publicly release this report, at a minimum, on an annual basis.

I. Legislative Language

This document responds to the legislative language set forth in Section 2(a) of the *Immigration and Naturalization Service Data Management Improvement Act of 2000* (Pub. L. No. 106-215) and the Joint Explanatory Statement, which accompanies the Fiscal Year 2021 Department of Homeland Security Appropriations Act (P.L. 116-260).

Section 2(a), amending section 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, states in relevant part:

“(e) REPORTS —

“(1) In General — Not later than December 31 of each year following the commencement of implementation of the integrated entry and exit data system, the Attorney General shall use the system to prepare an annual report to the Committees on the Judiciary of the House of Representatives and of the Senate.

“(2) Information — Each report shall include the following information with respect to the preceding fiscal year, and an analysis of that information:

(A) The number of aliens for whom departure data was collected during the reporting period, with an accounting by country of nationality of the departing alien.

(B) The number of departing aliens whose departure data was successfully matched to the alien’s arrival data, with an accounting by the alien’s country of nationality and by the alien’s classification as an immigrant or nonimmigrant.

(C) The number of aliens who arrived pursuant to a nonimmigrant visa, or as a visitor under the visa waiver program under section 217 of the Immigration and Nationality Act (8 U.S.C. 1187), for whom no matching departure data have been obtained through the system or through other means as of the end of the alien’s authorized period of stay, with an accounting by the alien’s country of nationality and date of arrival in the United States.

(D) The number of lawfully admitted nonimmigrants identified as having remained in the United States beyond the period authorized by the Attorney General, with an accounting by the alien’s country of nationality.

Joint Explanatory Statement states:

JES- Visa Overstays.-Consistent with section 1376 of title 8, United States Code, the Department is directed to submit an updated report outlining its comprehensive strategy for overstay enforcement and deterrence not later than 180 days after the date of enactment of this Act. The report shall detail ongoing actions to identify aliens who have overstayed their visas, including efforts to improve overstay reporting capabilities; notify aliens in advance of their required departure dates; track overstays for enforcement action; refuse or

revoke current and future visas and travel authorization; and otherwise deter violations or take enforcement action.

II. Background

The purpose of this report is to identify the Fiscal Year (FY) 2020 country-by-country overstay rates for all air and sea in-scope⁶ nonimmigrant classes of admission.

The overstay identification process is conducted utilizing arrival, departure, and immigration benefit information, which is consolidated to generate a complete history for individuals who traveled to the United States and were subsequently admitted, as described below.

U.S. Customs and Border Protection (CBP) receives traveler manifests from commercial sea and air carriers and private aircraft for all arrivals to and departures from the United States. These manifests indicate who is aboard the aircraft or vessel. In the land environment, CBP receives travel data on persons who enter Canada from the United States at a land port of entry (POE). Additionally, CBP can reconcile a significant portion of travelers who enter through our borders with both Canada and Mexico since the majority of these travelers are frequent border crossers, and CBP is able to close a previous arrival when recording a new arrival.

CBP Officers (CBPO) interview travelers upon arrival at United States POEs to determine the purpose and intent of travel. CBPOs collect biographic information on all nonimmigrants applying for admission and confirm the accuracy of the biographic manifest data provided by the carriers, which are subject to fines for any missing or inaccurate data. For most foreign nationals, CBP also collects fingerprints and digital photographs⁷ to conduct biometric comparisons against data previously provided to the United States. In addition, CBP strengthened the document requirements at air, land, and sea POEs by requiring all travelers, U.S. citizens, and foreign nationals alike, to present a passport or other acceptable document that denotes identity and citizenship when entering the United States.⁸

For departing travelers, air and sea carriers provide biographic manifest data for all travelers prior to leaving the United States. Federal regulation requires the carriers to provide specific sets of data, which most often include name and passport number, and the carriers are subject to fines for missing or inaccurate data. CBP then matches these biographic departure data against arrival data to determine who has complied with the terms of admission and who has overstayed. CBP maintains a separate system specifically for this purpose. This system also receives other DHS data relevant to whether a person is lawfully present, such as immigration benefit information or information on student visitors to the United States.

In general, transportation hubs and border infrastructure in the United States were not constructed with exit processing in mind. For example, airports in the United States do not have areas designated exclusively for travelers leaving the United States. Instead, traveler departures are recorded biographically using outbound passenger manifests provided by commercial carriers. Carriers also are required to validate the manifest against the travel document presented

⁶ See Appendix A for a full list defining “In-Scope nonimmigrant classes of admission”

⁷ 8 C.F.R. §235.1(f)(1)(ii)

⁸ The Western Hemisphere Travel Initiative is a joint U.S. State Department/DHS initiative that implemented §7209 of the Intelligence Reform and Terrorism Prevention Act of 2004 (Pub. L. No. 108-458).

by the traveler before he or she is permitted to board his or her aircraft or sea vessel. To complement the biographic data collection that already exists, CBP is also implementing a congressionally mandated biometric entry-exit system, as authorized in several statutes and regulations.⁹ This program matches live photos of travelers to images in CBP holdings, which may include photos from passports, visa photos, or from previous border crossings, to better confirm the traveler's identity as well as confirm exit crossings for noncitizens required to provide biometrics.¹⁰

Travelers arrive at land POEs via various modes of transportation, including cars, trains, buses, bicycles, trucks, and on foot. There are major physical, logistical, and operational obstacles to collecting an individual's biographic and biometric data upon departure. Due to the existing limitations in collecting departure data in the land environment, this report provides limited departure and overstay information for land POEs. CBP's ongoing efforts, described in this report, will continue to improve the existing process and availability of departure data.

⁹ Statutes that require DHS to take action to create an integrated entry-exit system: Sec. 2(a) of the Immigration and Naturalization Service Data Management Improvement Act of 2000 (DMIA), P.L. 106-215, 114 Stat. 337; Sec. 110 of the Illegal Immigration Reform and Immigrant Responsibility Act of 1996, P.L. 104-208, 110 Stat. 3009-546; Sec. 205 of the Visa Waiver Permanent Program Act of 2000, P.L. 106-396, 114 Stat. 1637, 1641; Sec. 414 of the Uniting and Strengthening America by Providing Appropriate Tools Required to Intercept and Obstruct Terrorism Act of 2001 (USA PATRIOT Act), P.L. 107-56, 115 Stat. 272, 353; Sec. 302 of the Enhanced Border Security and Visa Entry Reform Act of 2002 (Border Security Act), P.L. 107-173, 116 Stat. 543, 552; Sec. 7208 of the Intelligence Reform and Terrorism Prevention Act of 2004 (IRTPA), P.L. 108-458, 118 Stat. 3638, 3817; Sec. 711 of the Implementing Recommendations of the 9/11 Commission Act of 2007, P.L. 110-53, 121 Stat. 266, 338; and Sect. 802 of the Trade Facilitation and Trade Enforcement Act of 2015, P.L. 114-125, 130 Stat. 122, 199. In addition, through the Consolidated Appropriations Act of 2016 and the Bipartisan Budget Act of 2018, Congress authorized up to \$1 billion in visa fee surcharges through 2027 to support biometric entry/exit. P.L. 114-113 129 Stat. 2242 (December 17, 2015); P.L. 115-123 132 Stat. 64 (February 9, 2018).

¹⁰ For additional information see the Traveler Verification Service Privacy Impact Assessment, available at: <https://www.dhs.gov/publication/dhscbppia-056-traveler-verification-service>.

III. Existing Operations

A. Air and Sea Environments

Today, in the air and sea environments, CBP obtains entry records through both carrier-provided manifest data and inspections conducted by CBPOs. CBP obtains biographic data on travelers who lawfully enter or depart the United States by air or sea.¹¹ Federal regulation requires air and sea carriers to submit passenger manifests to CBP; these are then recorded as arrivals to, or departures from, the United States.¹² Air carriers are required to provide data not solely on who has made a reservation for a particular flight, but who is actually on the aircraft at the time the aircraft departs.¹³ Airlines are subject to fines for making errors regarding who is or is not on any particular aircraft.¹⁴

Although CBP currently obtains biographic arrival and departure information on almost all foreign nationals in the air and sea environments, and biometric entry data in the air environment, CBP is committed to continuously improving existing biometric and biographic exit and entry processes. This work is providing new opportunities to verify an individual's identity and facilitate collection of new biographic information on individuals where none previously existed.

Biometric Air Exit

CBP built a facial biometric matching service using biographic Advance Passenger Information System manifest data and existing photographs of travelers boarding international flights. The biometric matching service is a robust cloud-based service that leverages existing advance traveler information to create a pre-positioned “gallery” of face images from U.S. Government holdings. The galleries are smaller, more manageable data sets that can be segregated based on Advance Passenger Information System data for specific flights. The photographs can come from passport applications, visa applications, or interactions with CBP at a prior border encounter. The biometric matching service then compares a live photo of the traveler to the gallery of face images for that flight to identify the traveler and enable CBP to biometrically confirm the entry of in-scope noncitizens.¹⁵ On exit, the matching service identifies the traveler, creates an exit record, and enables CBP to biometrically confirm the departure of in-scope noncitizens.

CBP is working towards full implementation of biometric exit in the air environment to account for over 97 percent of departing commercial air travelers from the United States. In FY 2020, over 13 percent of in-scope noncitizens departing the United States were matched biometrically

¹¹ In addition, the Department obtains biometric information on all nonimmigrants who enter the United States via air and sea, except for those who are exempt by regulation, which includes those over the age of 79 or under 14, diplomats, and certain other discrete categories. See 8 C.F.R. §§ 235.1(f)(1)(ii); 235.1(f)(1)(iv).

¹² 8 C.F.R. §231.1, (describing the specific data elements for each passenger that carriers are required to provide).

¹³ 19 C.F.R. §§ 122.49a; 122.75a.

¹⁴ 8 U.S.C. § 1221(g).

¹⁵ In-scope noncitizens are noncitizens who may be required to provide biometrics for entry under 8 CFR 235.1(f) or departure under 8 CFR 215.8(a).

upon exit. To realize full implementation, CBP partnered with airports and airlines to deploy solutions to use biometric exit data utilizing cameras supplied by airports or airlines, which are integrated with the biometric solution.

At the end of FY 2020, biometric capabilities were available at 26 locations. Biometric exit operations can be conducted by CBP or airline employees and may not be operational at all gates or on all flights. CBP continues to work with industry partners to implement biometric solutions at the remaining airports in the United States, as well as increasing utilization at existing locations. Since its inception, over 13.4 million passengers on over 106,000 flights have been biometrically matched using the technology on exit, with an average biometric match rate of 98 percent. At the end of FY 2020, over 50,000 Out-of-Country Overstays have been biometrically confirmed. Furthermore, similar successes have occurred when using the biometric technology in the air entry environment. To date, CBP has used biometric technology to identify at least 18 travelers attempting entry presenting travel documents not belonging to them or that were altered travel documents.

B. Land Environment

The collection of departure information in the land environment is more difficult than in the air and sea environments due to the major physical, logistical, and operational obstacles involved with electronically collecting an individual's biographic and biometric data. Additionally, in the land environment, it is not feasible to obtain advance reporting of arrivals and departures, as most travelers cross the borders as a driver or passenger in a vehicle or as a pedestrian.

Land Biometric Exit Mobile

In FY 2018, CBP expanded the use of the Biometric Exit Mobile (BE-Mobile) program at land borders nationwide. CBP deployed mobile technology to the land border POEs, which allowed CBP officers working outbound pulse and surge operations to process exiting travelers using the BE-Mobile application. The BE-Mobile application creates a biometrically confirmed exit record for a departing traveler. This capability is another means by which CBP can close out entry/exit records biometrically, thus, helping to resolve some potential overstay records. In FY 2020, the land border biometric efforts continued to expand with the planned and ongoing deployments of land biometric arrival.

Northern Border Exit

In 2011, Canada and the United States developed an entry and exit initiative under which Canada and the United States agreed to exchange biographic entry records for land crossings between the two countries, so that an entry into one is recorded as an exit from the other. On June 30, 2013, Canada and the United States began exchanging biographic entry data for third-country nationals (including permanent residents of Canada and United States lawful permanent residents) who enter through land POEs along the shared border, where information is collected electronically. Because of this initiative, the United States has a working biographic land border exit system on its Northern border for non-Canadian citizens; furthermore, legislation passed in Canada to add

Canadian citizen data in June 2019. CBP is analyzing the additional crossing data provided by Canada for enhanced overstay statistical capabilities.

CBP currently matches 97.67 percent of the entry information received from Canada to an entry in the Arrival and Departure Information System (ADIS). To date, this data-sharing agreement has led to over 63.7 million departure records. CBP uses this information to resolve previous traveler air or sea arrivals into the United States for those cases where the traveler may then subsequently depart by land to Canada.

Southern Border

On the southern border, CBP conducts outbound pulse and surge operations as part of its law enforcement mission. These operations are ongoing and provide some outbound departure information on travelers departing the United States and entering Mexico. Southern border exits include both vehicle and pedestrian.

Pedestrian

In FY 2018 and early FY 2019, CBP began to demonstrate the feasibility of collecting photos from arriving travelers and comparing those photos to documents presented by the traveler. As of November 2020, CBP has apprehended almost 200 imposters at the deployed locations. As of November 2020, CBP has deployed biometric capability to twenty-six locations representing 13 POEs. Those locations are San Luis, Nogales (DeConcini, Morley Gate, and Mariposa); El Paso (Paso Del Norte Bridge and Bridge of the Americas); Ysleta; Laredo (Convent Street, Lincoln-Juarez Bridge, Columbia, and World Trade Bridges); Brownsville (Brownsville & Matamoros, Veterans, and Gateway Bridges); Progreso; Blaine (Pacific Highway and Peace Arch); Detroit (Ambassador Bridge, Fort Street, and Windsor Tunnel); Champlain; Cross Border Express; Tecate; and Buffalo (Peace, Rainbow, and Lewiston Bridges).

Vehicle

In FY 2018, CBP conducted a technical demonstration using facial comparison technology to identify persons inside vehicles moving under 20 miles per hour entering and departing the Anzalduas, Texas POE. CBP is planning to pilot facial recognition technology on entry at Anzalduas by the end of FY 2021. This work builds on previous technical demonstrations, and seeks to inform the agency on next steps to developing and implementing biometric entry/exit in the land border vehicular environment. In FY 2021, the pilot will examine how identity information gathered through the cameras could be used to assist CBP officers in border crossings for vehicles, and to help close out additional entry/exit records at the land border.

C. Overstay Definition

An overstay is a nonimmigrant who was lawfully admitted to the United States for an authorized period but stayed in the United States beyond his or her authorized admission period.

Nonimmigrants admitted for “duration of status,” who fail to maintain their status, may also be considered overstays. “Duration of status” is a term used for foreign nationals who are admitted

for the duration of a specific program or activity, which may be variable, instead of for a set timeframe.¹⁶ The authorized admission period ends when the foreign national has accomplished the purpose for which they were admitted, or is no longer engaged in authorized activities pertaining to that purpose. For example, a student who enters the United States for a program that runs for four years must leave when the program is completed, change to another immigration status, or go on to pursue another program of study.

CBP classifies individuals as overstays by using the ADIS system to match departure and status change records to arrival records collected during the admission process. CBP further identifies nonimmigrant status through manual vetting processes to support possible enforcement action. CBP identifies an individual as having overstayed if his or her departure record shows he or she departed the United States after his or her authorized admission period expired¹⁷ (i.e., Out-of-Country Overstays). Although these individuals are considered overstays, there is evidence indicating they are no longer physically present in the United States. CBP also identifies individuals as possible overstays if there are no records of a departure or change in status prior to the end of their authorized admission period (i.e., Suspected In-Country Overstays).¹⁸

In this report, the Department presents ADIS-generated overstay rates by country of citizenship for nonimmigrant visitors who were admitted to the United States through air or sea POEs, regardless of overstay type.¹⁹ The ADIS-generated overstay rates produced for this report depict a snapshot of statistics reflecting the date the data was pulled for analysis. Although significant progress has been made, challenges remain with the integration of systems used in the travel continuum for reporting on classes of admission associated with land entry. It is anticipated these challenges will be mitigated in the future through improvements in land data collection for individuals exiting the United States and improvements in data exchanges with Canada and Mexico.

The following nonimmigrant classes of admission are not included in the report due to unspecified authorized periods of stay and legal protections: diplomats and other representatives, crewmembers, noncitizens in transit, and Section 1367 special-protected classes (Appendix B).

¹⁶ For example, “duration of status” for F nonimmigrants is defined as “the time during which an F-1 student is pursuing a full course of study at an [approved] educational institution . . . or engaging in authorized practical training following completion of studies, . . .” 8 C.F.R. 214.2(f)(5)(i).

¹⁷ In these cases, DHS sanctions the individual who overstayed the authorized period of stay in the United States according to immigration law, which is based on a sliding scale of penalties depending on the length of time unlawfully present in the United States. See, e.g., 8 U.S.C. § 1202(g) (nonimmigrant visa is voided at conclusion of authorized period of stay, if an individual remains in the United States beyond the authorized period); 8 U.S.C. § 1187(a)(7) (referring to the VWP, “if the noncitizen previously was admitted without a visa under this section, the noncitizen must not have failed to comply with the conditions of any previous admission as such a nonimmigrant”); and 8 U.S.C. § 1182(a)(9)(B)(i)(I) and (II) (noncitizen inadmissible for 3 years if unlawfully present for more than 180 days but less than a year; noncitizen inadmissible for 10 years if unlawfully present for a year or more, pursuant to various provisions of the Immigration and Nationality Act).

¹⁸ Pending immigration benefit applications and approved extensions of stay, change of nonimmigrant status, or adjustment of status to lawful permanent resident may extend or modify the authorized period of stay. For example, upon entering the United States a person may be granted a six-month period of admission, but thereafter lawfully change immigration status prior to the expiration of that period, and in turn be authorized to stay beyond the initial six months. These options are not available to all categories of noncitizens. See 8 U.S.C. 1258, 8 C.F.R. 248.2. For example, those who enter under the VWP are generally not eligible to change or extend their nonimmigrant status. 8 C.F.R. § 245.1(b)(8); 8 C.F.R. § 248.2(a)(6).

¹⁹ The sea overstay rates are only reflective of the population that initially entered the United States through a sea POE but is not reflective of all traveler arrivals where the vessel both departs from and subsequently arrives at the same location (commonly referred to as “closed loop” cruises.) For example, if a foreign national already within the United States departs from the Port Canaveral, Florida Seaport for a seven-day cruise in the Caribbean and subsequently re-enters at Port Canaveral, then that arrival would not be taken into account for the purposes of this report.

D. Overstay Identification and Action

CBP maintains arrival and departure information for all foreign nationals based on border crossings and carrier data. This information is used to generate daily overstay lists by the ADIS system. These system-generated overstay lists are sent for checks against the CBP Automated Targeting System-Passenger and the U.S. Citizenship and Immigration Services Computer Linked Application Information Management System 3 database, reducing the overall list size by identifying persons who have departed the United States or adjusted their status to another nonimmigrant or immigrant category. For Suspected In-Country Overstays, the CBP Automated Targeting System-Passenger then applies screening rules, as defined by U.S. Immigration and Customs Enforcement (ICE), to determine the level of priority for each system-identified overstay.

As part of the overstay enforcement mission, DHS operational units further vet these system-identified Suspected In-Country and Out-of-Country Overstay leads. The In-Country Overstay leads are worked by ICE. ICE's Homeland Security Investigations (HSI) Counterterrorism and Criminal Exploitation Unit (CTCEU) is a national program dedicated to the investigation of nonimmigrant violations that pose a national security or public safety concern. Each year, CTCEU analyzes records of over one million potential status violators from various investigative databases and DHS entry/exit registration systems. To better manage investigative resources, CTCEU relies on a prioritization framework for these leads established in consultation with interagency partners within the national intelligence and federal law enforcement communities. Those identified as posing a potential national security or public safety concern are prioritized and referred to HSI field offices for investigation. Where nonimmigrant violators are identified but do not meet CTCEU's criteria for investigation, HSI refers the case to ICE's Enforcement and Removal Operations National Criminal Analysis and Targeting Center, which works in close coordination with CTCEU for further vetting. If the lead is credible and justifies further investigation, it is then forwarded to the respective ICE's Enforcement and Removal Operations field office for enforcement action.

ICE HSI Special Agents and analysts continuously monitor threat reports and proactively address emergent issues. This practice has contributed to ICE HSI's counterterrorism mission by managing and supporting high-priority national security initiatives based on specific intelligence from intra- and inter-agency partners. The goal is to identify, locate, and where applicable, prosecute and remove those overstays posing current or potential national security and public safety concerns to the United States. ICE HSI accomplishes its mission by conducting specialized research and analysis, executing targeted operations and special initiatives, and leveraging ICE's expertise with partnering agencies. As part of the overstay enforcement mission, ICE focuses its investigations on those subjects who pose a concern to national security or public safety.

Throughout FY 2020, CBP continued to review and vet Out-of-Country Overstays. The ADIS Vetting Unit receives Out-of-Country Overstays leads for CBP Officers and analysts to vet and review daily. If during the vetting process a traveler is confirmed to have overstayed, the traveler may lose their eligibility to participate in the Visa Waiver Program (VWP) or their nonimmigrant visa will no longer be recognized valid by CBP. In addition, a 3-year or 10-year

reentry bar may be placed on the traveler on subsequent entries to the United States. To date, the work of the ADIS Vetting Unit has resulted in over 121,531 actions taken of this kind.

CBP notifies VWP travelers in violation of their immigration status via email and through CBP's public website providing I-94 and other immigration data. As part of this effort, the public I-94 website has been updated to provide VWP travelers with a web portal where they can search their arrival and departure records. In January 2018, CBP began notifying VWP travelers in advance of the end date of their period of authorized admission. CBP plans to further expand these notifications to other immigration populations.

To date, over 621,994 email notifications have occurred.²⁰ The goal is to improve travelers' awareness, especially as it pertains to the length of time for which travelers are admitted to the United States. CBP expects these proactive communications and improvements will provide tools for travelers to be cognizant of their immigration status, especially as it pertains to their period of admission while in the United States.

E. Overstay Rates and COVID-19

Due to the COVID-19 outbreak, the FY 2020 data represents an anomaly when compared with the prevailing trend of decreasing Overstay Rates across the FY 2018 and FY 2019 Entry and Exit Overstay Reports. The goal of this report is to represent the Overstay Rates as accurately as possible. It should be acknowledged that a decrease in travel to the United States resulted in a decrease of FY 2020 Expected Departures. Expected Departures in FY 2020 were 17.40 percent lower than in FY 2019 and were 6,072,109 less than the 5-year average of 52,319,638²¹.

Travel restrictions enacted in response to the COVID-19 outbreak were issued across several Executive Orders. The Executive Orders issued in response to COVID-19 as relevant to the findings in this report are as follows:

- Travel restrictions placed on China and foreign nationals who have traveled to China within the last 14 days (February 2, 2020)²².
- Travel restrictions placed on Iran and foreign nationals who have traveled to Iran within the last 14 days (March 2, 2020)²³.

²⁰ As of September 30, 2020.

²¹ Based on Expected Departure totals FY 2015 through FY 2019.

IV. Overstay Rates

Tables 1 – 6 represent country overstay rates from FY 2020. For this report, the term “in-scope” includes the following categories of nonimmigrant admissions: temporary workers and families (temporary workers and trainees, intracompany transferees, treaty traders, and investors), students, exchange visitors, temporary visitors for pleasure, temporary visitors for business, and other nonimmigrant classes of admission.²⁹ This report calculates overstays by entry rather than by individual. For example, if a traveler with a multiple entry visa enters multiple times during the reporting period and overstays more than once during this time, each time the traveler remains longer than the authorized period of admission is counted in this report as a separate overstay.

In Tables 1–6, the term “Expected Departures” represents the entries by travelers from each country who were lawfully admitted to the United States as a nonimmigrant and whose authorized period of admission expired within FY 2020. The “Total Number of Overstays” for each country equals the summation of both the Out-of-Country and Suspected In-Country Overstays (based on number of overstay entries) for a specific country. The “Overstay Rate” is the percentage of entries by travelers from each country who overstayed their authorized period of admission to the United States, regardless of type.³⁰ This rate is the percentage of the Total Number of Overstays compared with the current fiscal year’s Expected Departures.

CBP identified 46,195,116 in-scope nonimmigrants who were expected to depart the United States via air or sea in FY 2020. The FY 2020 nonimmigrant travel data identified a Suspected In-Country Overstay rate of 1.27 percent (584,885) and a total overstay rate of 1.48 percent (684,499) out of the overall expected departures of in-scope travelers in FY 2020.

Temporary Visitors for Business and Pleasure (Tables 2, 3, and 6)

Tables 2 and 3 present the overstay rates for temporary visitors for business and pleasure. The overstay rates for temporary visitors for business and pleasure traveling under the VWP or on a B1 or B2 visa are identified in Table 2. Similarly, Table 3 identifies the overstay rates for temporary visitors for business and pleasure admitted to the United States under B1 or B2 classes of admission for non-VWP countries excluding Canada and Mexico. The B1 and B2 overstay rates for Canada and Mexico (Table 6) are separate due to the high percentage of land travelers who are admitted to the United States relative to the other countries. It is important to note that the total number of overstays, as identified in this report, does not equal the total number of overstays who currently remain in the United States during this reporting period. That number is lower because foreign nationals identified as possible overstays can subsequently depart the

²⁹ See Appendix A for a full list of “In-Scope nonimmigrant classes of admission”

³⁰ Rates are shown for countries as well as passport-issuing authorities and places of origin recognized by the United States. With respect to all references to “country” or “countries” in this document, Section 4(b)(1) of the Taiwan Relations Act of 1979 (Pub. L. No. 96-8) provides that “[w]henver the laws of the United States refer or relate to foreign countries, nations, states, governments, or similar entities, such terms shall include and such laws shall apply with respect to Taiwan.” 22 U.S.C. § 3303(b)(1). Accordingly, references to “country” or “countries” in the VWP authorizing legislation, Section 217 of the Immigration and Nationality Act (8 U.S.C. § 1187), are read to include Taiwan. Taiwan entered the VWP on October 2, 2012.

United States or adjust their lawful status. For purposes of this report, these are still considered overstays.

VWP Countries Business or Pleasure Visitors Air and Sea Overstay Rate Summary

In FY 2020, CBP calculated there were 16,232,821 B1/B2/Waiver-Business (WB)/Waiver-Tourist (WT) expected departures for citizens of VWP countries. The FY 2020 VWP countries' total overstay rate is 0.64 percent of the VWP countries expected departures, and the Suspected In-Country Overstay rate is 0.56 percent of the VWP countries expected departures. DHS is in the process of determining how the data presented in this report can be best used to make decisions regarding the continued designation of countries in the VWP.

Non-VWP Countries Business or Pleasure Visitors Air and Sea Overstay Rate Summary (excluding Canada and Mexico)

For the FY 2020 non-VWP countries, CBP calculated 13,807,503 expected departures. The FY 2020 non-VWP total overstay rate is 2.55 percent of the non-VWP expected departures, and the Suspected In-Country Overstay rate is 2.22 percent of the non-VWP expected departures.

Students and Exchange Visitors

For the purposes of this Report, the term “Expected Departures” located in Table 4 refers to a date identified in the Student and Exchange Visitor Information System (SEVIS) based on the authorized program or employment status of an F or M student or J exchange visitor.³¹ The system-generated overstay leads are generated by ADIS matching information against SEVIS data. However, one current challenge in this process is that ADIS is a person-centric data, but SEVIS data is document-centric, meaning the system tracks a unique SEVIS identification number associated with each Form I-20 issued. In a person-centric environment an individual is either active or inactive, but in a document-centric environment a person could have multiple active records, making it difficult to determine if a person is in valid status. To address this issue, SEVIS is currently undergoing a modernization process to become a person-centric system, which will greatly enhance the automated matching capabilities between ADIS and SEVIS when generating automated overstay lists.

In FY 2020, CBP calculated a total of 1,801,550 students and exchange visitors who were expected to change status or depart the United States.³² The 1,801,550 is composed of 1,372,833 F, 13,828 M, and 414,889 J visa categories of admission. The F, M, and J Suspected In-Country Overstay rate is 1.55 percent of the total number of students and exchange visitors who were expected to change status or depart the United States. The Suspected In-Country Overstay rate is 1.43 percent for the F visa category, 2.02 percent for the M visa category, and 1.91 percent for the J visa category. The total overstay rate (*i.e.*, both Suspected In-Country and Out-of-Country Overstays) for students and exchange visitors in FY 2020 is 2.71 percent of the total number of students and exchange visitors who were expected to have changed status or departed from the

³¹ “F” includes (F1/F2), “M” includes (M1/M2), “J” includes (J1/J2) classes of admission

³² This figure does not include the F/M/J classes of admission for those visitors with a Mexican or Canadian Country of citizenship; those figures are included in table 4. With the inclusion of Canada and Mexico, the F/M/J total is 2,076,027 (1,526,215 F; 16,186 M; and 533,631 J)

United States in FY 2020. The total overstay rate is 2.59 percent for the F visa category, 10.92 percent for the M visa category, and 2.82 percent for the J visa category.

A. FY 2020 Overstay Rate Summary

The table below provides a high-level summary of the country-by-country data identified in Tables 2 through 6.

Admission Type	Expected Departures	Out-of-Country Overstays	Suspected In-Country Overstays	Total Overstays	Total Overstay Rate	Suspected In-Country Overstay Rate
<i>VWP Countries Business or Pleasure Visitors^{33,34} (Table 2)</i>	16,232,821	13,037	91,584	104,621	0.64%	0.56%
<i>Non-VWP Countries Business or Pleasure Visitors (excluding Canada and Mexico) (Table 3)</i>	13,807,503	46,292	306,456	352,748	2.55%	2.22%
<i>Students and Exchange Visitors (excluding Canada and Mexico) (Table 4)</i>	1,801,550	20,821	27,969	48,790	2.71%	1.55%
<i>All Other In-Scope Nonimmigrants³⁵ (excluding Canada and Mexico) (Table 5)</i>	1,916,143	9,607	33,647	43,254	2.26%	1.76%
<i>Canada and Mexico Nonimmigrants (Table 6)</i>	12,437,099	9,857	125,229	135,086	1.09%	1.01%
TOTAL	46,195,116	99,614	584,885	684,499	1.48%	1.27%

B. FY 2020 VWP Nonimmigrant Business or Pleasure Overstay Rates

Country of Citizenship	Expected Departures	Out-of-Country Overstays	Suspected In-Country Overstays	Total Overstays	Total Overstay Rate	Suspected In-Country Overstay Rate
<i>Andorra</i>	1,150	-	5	5	0.43%	0.43%
<i>Australia³⁶</i>	909,085	567	3,797	4,364	0.48%	0.42%

Table 6 represents Canadian and Mexican nonimmigrant visitors admitted at air and sea POEs who were expected to depart in FY 2020. Unlike all other countries, the majority of travelers

⁴⁹ The Canada and Mexico Expected Departure total comprises of 83,123 for the F visa category, 1,043 for the M visa category, and 23,056 for the J visa category.

⁵⁰ The Canada and Mexico Out-of-Country Overstay total comprises of 395 for the F visa category, 38 for the M visa category, and 112 for the J visa category.

⁵¹ The Canada and Mexico Suspected In-Country Overstay total comprises of 530 for the F visa category, 12 for the M visa category, and 303 for the J visa category.

from Canada or Mexico enter the United States by land. Overstay data concerning land entries will be incorporated into future iterations of this report as projects progress.

G. FY 2019 Suspected In-Country Overstay Trend

This section presents the change in the FY 2019 Suspected In-Country Overstay rates by major class of admission overtime. Table 7 provides a 3-, 6-, 9-, and 12-month snapshot of the Published FY 2019 Entry and Exit Overstay Report, Suspected In-Country Overstay figures, and the associated rates.

At the end of FY 2019, the overall Suspected In-Country Overstay number – i.e., those for whom the Department did not have evidence of a departure or transition to another immigration status – was 676,422 or 1.03 percent. As of September 30, 2020, the number of Suspected In-Country Overstays had further decreased to 324,593 rendering the FY 2019 Suspected In-Country Overstay rate 0.59 percent.

Admission Type	Expected Departures #	Suspected In-Country Overstay

**
excluding Canada and Mexico

V. Conclusion

Identifying noncitizens who overstay their authorized periods of stay is important for national security, public safety, immigration enforcement, and processing applications for immigration benefits.

Over the years, CBP significantly improved data collection processes in the entry environment. These improvements include the collection of data on all admissions to the United States by foreign nationals, the reduction of the number of documents that may be used for entry to the United States, the collection of biometric data on most foreign travelers to the United States, and the comparison of that data against criminal and terrorist watchlists. Despite the different infrastructural, operational, and logistical challenges presented in the exit environment, CBP has been able to resolve many of the issues regarding the collection of departure information for foreign nationals. Further efforts, including partnerships with foreign governments and the private sector (e.g., airlines, airports, cruise lines), are ongoing and will continue to improve data integrity.

During the past six years, CBP made significant progress in terms of the ability to accurately report data on overstays—progress that was made possible by Congressional realignment of Department resources to better centralize the overall mission in identifying overstays. In FY 2020, new biometric exit tests and deployments in both the land and air environment enabled continued progress toward the fusion of biometric and biographic verification of travelers. While these tests account for only a relatively small percentage of all the departure records for FY 2020, this is a significant increase from FY 2019 and a critical step forward towards implementing a comprehensive biometric entry and exit system.

CBP will continue to expand the entry and exit system during FY 2021, as it pertains to both biometric and biographic traveler data, which will improve CBP's ability to capture and report this data accurately. The Department will continue to annually release this overstay data to the public and examine trends over time, and looks forward to providing updates to Congressional members and their staff on its ongoing progress.

VI. Appendices

Appendix A. In-Scope Nonimmigrant Classes of Admission

CLASS OF ADMISSION DESCRIPTION	CODE
Temporary Workers and Trainees	
Commonwealth of the Northern Mariana Islands-only transitional workers	CW1
Spouses and children of CW1	CW2
Temporary workers in specialty occupations	H1B
Chile and Singapore Free Trade Agreement noncitizens	H1B1
Registered nurses participating in the Nursing Relief for Disadvantaged Areas	H1C
Agricultural workers	H2A
Nonagricultural workers	H2B
Returning H2B workers	H2R
Trainees	H3
Spouse and unmarried child(ren) under 21 years of age of H1B, H1B1, H1C, H2A, H2B, H2R, or H3	H4
Workers with extraordinary ability or achievement	O1
Workers accompanying and assisting in performance of O1 workers	O2
Spouses and children of O1 and O2	O3
Internationally recognized athletes or entertainers	P1
Artists or entertainers in reciprocal exchange programs	P2
Artists or entertainers in culturally unique programs	P3
Spouses and children of P1, P2, or P3	P4
Workers in international cultural exchange programs	Q1
Workers in religious occupations	R1
Spouses and children of R1	R2
North American Free Trade Agreement professional workers	TN

Parent of U1, Special Protected Class	U4
Sibling unmarried of U1, Special Protected Class	U5
Special Protected Class, Violence against Women Act	VAWA
Other	
Crewmen	D1

Appendix C. FY 2019 Entry and Exit Overstay Report

FY 2019 Entry/Exit Overstay Report Overview

Below are the tabulated rates from the FY 2019 Entry and Exit Overstay Report. The inclusion of these tables is for reference only. The FY 2019 Report provides data on expected departures and overstays, by country, for foreign travelers to the United States who entered as nonimmigrants through an air or sea POE and who were expected to depart in FY 2019 (October 1, 2019 – September 30, 2020). It does this by examining the number of entries, by country, for foreign travelers who arrived as nonimmigrants during this time as of October 1, 2019.

At the end of FY 2019, the overall Suspected In-Country Overstay number – i.e., those for whom the Department did not have evidence of a departure or transition to another immigration status – was 676,422 or 1.03 percent. As of December 1, 2019, the number of Suspected In-Country Overstays had further decreased to 339,302 rendering the FY 2019 Suspected In-Country Overstay rate 0.64 percent.

FY 2019 Overstay Rate Summary

The table below provides a high-level summary of the country-by-country data identified in Tables C-2 through C-6.

Admission Type	Expected Departures	Out-of-Country Overstays	Suspected In-Country Overstays	Total Overstays	Total Overstay Rate	Suspected In-Country Overstay Rate
<i>VWP Countries Business or Pleasure Visitors^{54,55} (Table 2)</i>	23,248,729	12,674	89,831	102,505	0.44%	0.39%
<i>Non-VWP Countries Business or Pleasure Visitors (excluding Canada and Mexico) (Table 3)</i>	15,501,970	25,140	294,946	320,086	2.06%	1.90%
<i>Students and Exchange Visitors (excluding Canada and Mexico) (Table 4)</i>	1,949,166	30,754	29,557	60,311	3.09%	1.52%
<i>All Other In-Scope Nonimmigrants⁵⁶ (excluding Canada and Mexico) (Table 5)</i>	1,963,899	19,604	41,316	60,920	3.10%	2.10%
<i>Canada and Mexico Nonimmigrants (Table 6)</i>	13,265,226	13,510	119,090	132,600	1.00%	0.90%
TOTAL	55,928,990	101,682	574,740	676,422	1.21%	1.03%

⁵⁴ Upon admission into the United States, visitors classified under either a WT (waiver-tourist) or a WB (waiver-business) status.

⁵⁵ Citizens or nationals of VWP countries may also obtain and travel to the United States on a B1/B2 visa and seek admission under the B1 or B2 nonimmigrant classification.

⁵⁶ See Appendix A for a complete list of “In-Scope nonimmigrant classes of admission”
